Dear Hiring Manager,

I am writing to express my interest in the **Full Stack Web Developer Internship** position at your company. I am currently studying Computer Science at the **Institute of Technology of Cambodia (ITC)** and have a strong passion for web development, backend systems, and modern technologies.

Through academic projects and practical experience, I have developed skills in frontend and backend development using technologies such as **HTML, CSS, JavaScript, Vue.js, PHP, Spring Boot, MySQL, Docker, and GitHub**. I enjoy developing scalable web applications, APIs, and solving real-world technical problems.

I have worked on several projects including a **Coffee Aroma Full Stack Web Application, CPU Scheduling Visualizer, and File Extension Validator**. These projects strengthened my understanding of software development, database design, problem-solving, and system architecture.

In addition, I gained practical experience as a Backend Development Trainee at **ETEC Center**, where I worked with RESTful APIs, database integration, debugging, and collaborative development environments. I also worked as a part-time IT instructor, helping students learn programming fundamentals and logical thinking skills.

I am a motivated and fast-learning individual who is eager to improve my technical skills and gain more real-world industry experience. I would be excited to contribute my technical skills, creativity, and enthusiasm to your development team while continuing to learn from experienced professionals.

Thank you for your time and consideration. I look forward to the opportunity to discuss my qualifications further.

Best Regards,

Rin Nairith
